

NHS Summary Care Record with Additional Information

Your Summary Care Record has import information about your health in it:

- Medicines you take
- Allergies you have
- Any medicines that make you ill.

If you need to see a doctor or nurse at a location other than Sett Valley Medical Centre, they will ask you if they can look at your SCR to help them treat you quickly and safely. Looking at your SCR could:

- Stop them making a mistake, because they can see your medicines, allergies or what medicines make you ill
- Help them see your GP information on your SCR straight away.

You can also have other information added to your SCR

- Your illnesses and any health problems that you have
- Operations and vaccinations you have had in the past
- How you would like to be treated
- What support you might need
- Who should be contacted for more information about you.

What to do next

If you would like this additional information to be added to your SCR, then please complete the following information and hand this form in to Sett Valley Medical Centre Reception. If you change your mind at any time, simply let us know.

Name: _____

Date of Birth: _____
